Research Roundtable
Paul Juang, Pharm.D., BCPS
Assistant Professor of Pharmacy Practice
St. Louis College of Pharmacy

Research Process

- Develop an idea or question to be answer
- Research on appropriate background
- Develop a research hypothesis (refine the question to be asked)
- Determine the objectives of the research
- Develop the study methodology
- Collect data
- Compile and analyze data to generate results
- Publication of relevant findings

Developing Great Research Questions

- Ask interesting question
- Select suitable questions for research
- Turn the research question into a workable hypothesis

Useful References in Developing Research Questions
